

Prompt: Build and track habits effectively

I want to build better habits. Please help me create a simple, beginner-friendly plan.

1. Help me choose 1–3 habits I want to start.

I'll add the habits at the end.

2. For each habit, create a clear habit plan that includes:

- When I will do it each day (specific time or trigger)
- How I will remember it (reminder or cue)
- How to start small and build gradually
- Likely obstacles and how to handle each one

3. Create a simple daily habit-tracking system:

- A one-page template or table I can copy into Google Sheets, Excel, or print
- Space for 30 days of tracking
- Columns for: Habit, Day, Completed (Yes/No), Notes

4. Give me motivation tips:

- How to stay consistent
- How to avoid losing momentum
- How to reward progress

5. Tell me exactly what to do if I miss a day:

- A short reset plan
- A “never miss twice” rule
- How to get back on track without guilt

Keep everything simple, clear, and actionable. I'm just starting out.
