

Prompt: Smart Weekly Schedule Builder Prompt

Act as my productivity coach and help me create a realistic weekly schedule I can follow. Ask me only the essential questions you need:

1. What tasks do I need to complete this week?
2. How long does each task take?
3. Which days am I available?
4. How many hours per day can I realistically commit?
5. What fixed meetings, deadlines, or appointments do I already have?

After gathering this information, build a structured weekly schedule that includes:

- Clear time blocks for each task
- Breaks and buffer time
- Logical ordering of tasks (heavy → light)
- A simple daily checklist to keep me on track
- A short end-of-week review
