

Prompt: Analyze Statement for UPI

I've exported my UPI transactions and uploaded the file. Please analyse them and do the following:

- 1. Categorise every transaction** into:
 - Food & groceries
 - Travel
 - Bills & utilities
 - Shopping
 - Subscriptions
 - Entertainment
 - Transfers
 - Other
- 2. Create a summary** showing:
 - Total spent in each category
 - Top merchants I spend on
 - Highest-value transactions
 - Unusual or duplicate transactions
- 3. Identify problem areas**
 - Where I am overspending
 - Which expenses I can reduce
- 4. Give me 5 actionable money-saving suggestions** based on my habits
- 5. Present everything in a clean, easy-to-read format** (table + insights)

If any transaction is unclear, assume the most likely category and move on.
