

Prompt - Analyzing Credit card statement

Act as my personal finance coach. I've uploaded my credit card statement — please analyze it and give me a clear, structured breakdown. I want you to:

1. Categorize My Spending

Organize every transaction into:

- Groceries & essentials
- Food delivery & restaurants
- Travel & transport
- Shopping
- Entertainment
- Subscriptions
- Bills & utilities
- EMI/loan payments
- Miscellaneous

2. Summarize My Monthly Spending

Show me:

- Total spent
- Total due
- Minimum amount due
- Interest/fees charged
- Top 5 spending categories
- Top 5 merchants I spend most on

3. Identify Problem Areas

Highlight:

- Overspending patterns
- Duplicate/suspicious transactions
- Forgotten subscriptions
- Any late fees or penalty triggers
- Behaviors that could lead to debt buildup

4. Give Me 5 Practical Money-Saving Suggestions

Make them realistic, specific, and based on my spending habits.

5. Explain Key Insights Clearly

If you notice anything risky or important—like recurring high-interest charges, cash advance fees, or revolving balances—explain it in simple terms so I understand the impact.

If a transaction category is unclear, make your best guess and continue.
