

Prompt Framework - Structure of a Prompt

A **prompt** is the message you type to an AI tool to tell it what you want. The clearer your prompt → the better the output.

Component	Purpose	Example Phrase	Usage Level
1. Role	Defines the persona the AI should adopt, setting the knowledge base and perspective.	"Act as a senior recruiter and resume specialist ..."	Essential
2. Task	States the primary goal or objective of the interaction.	"...create a detailed improvement plan for my resume."	Essential
3. Context	Provides all necessary background information, data, or files the AI needs to complete the task.	"Here is the Job Description and my current resume text ..."	Essential
4. Constraints	Sets rules or limitations (e.g., length, excluded topics, complexity level).	"...limit your analysis to five key points and do not use jargon ."	Optional but Recommended

5. Output Format	Specifies the structure in which the final answer should be delivered.	"...present the results in a comparison table with a summary paragraph ."	Recommended
6. Tone	Dictates the style and attitude the AI should use when responding.	"...maintain a professional, critical, yet helpful tone."	Optional
7. Steps	Provides a numbered sequence or workflow the AI must follow to reach the goal.	" First , perform a keyword analysis. Second , rewrite the top three bullets. Third , suggest a summary."	Optional (For Complex Tasks)
8. Ask-then-Do	Instructs the AI to seek clarification or confirmation <i>before</i> executing the main task.	" Before you begin , ask me to confirm the target industry."	Optional (For Ambiguous Context)
