

Prompt: Analyze resume based on the JD

I want you to help me evaluate and improve my resume for a specific job. Act as an experienced recruiter and resume specialist.

The job I'm applying for:

(I will paste the job description and my resume after this.)

Please provide a clear, organized document covering the points below:

1. Relevance Check

- Which of my experiences are most relevant to this job?
- Which achievements or projects should be highlighted more strongly?

2. Keyword & Terminology Alignment

- What important terms, keywords, and phrases from the job description should I include to match ATS requirements?
- Identify any role-specific language or metrics I should add.

3. Gap Analysis & Substitutes

- If I'm missing any required qualifications or experience, what transferable skills or strengths can I emphasize instead?
- Suggest realistic ways to bridge or reframe gaps.

4. Resume Improvement Suggestions

- What should I add, remove, or rewrite to make my resume clearer, stronger, and more aligned with the role?
- Recommend improvements to structure, bullets, clarity, and impact.
- Point out anything that might be outdated or weak.

5. ATS Optimization

- Make sure all recommendations help improve ATS compatibility.
- Suggest formatting, phrasing, and keyword optimizations that ensure the resume passes automated scans.
