

Prompt: Creating STAR Stories from Your Experience

I want to create strong STAR stories (Situation, Task, Action, Result) for job interviews. Please help me turn my work experiences into clear, compelling, and concise stories.

Here's the experience I want to work on:
(I will paste the experience after this.)

What I need from you:

1. Extract the STAR Framework

- Situation: Summarize the context in 1–2 lines.
- Task: What was my responsibility or goal?
- Action: What specific steps did I take? (Focus on *my* contribution.)
- Result: What outcome did I achieve? Include metrics or impact where possible.

2. Create a Polished STAR Story

- Turn the above into a strong, 4–6 sentence story suitable for interviews.
- Make it structured, confident, and easy to remember.

3. Provide a Short “30-Second Version”

- A concise version I can use for quick answers.
